## REMARKS

The figures of births and deaths shown in this statement for week ending the 7th July 1951, relate to 194 towns with an estimated population of 24,891 thousands. The total number of towns is 236 and their population is 28,965 thousands. Thus 82% of the total number of towns representing 86% of the total population is covered in this statement. The numbers of births and deaths recorded in these towns were 13,772 and 6,924 representing birth and death rates of 28.8 and 14.5 per thousand of population respectively.

(A) States (Parts A and C).—The data here relate to 174 towns with an estimated population of 22,117 thousands. Information about Assam could not be included. The total number of towns is 204 and their population is 25,135 thousands. Thus 85% of the total number of towns representing 88% of the total population is covered. The numbers of births and deaths

recorded in these towns were 12,306 and 6,333 representing birth and death rates of 28.9 and 14.9 per thousand of population respectively. The table at the end gives the position by States.

No towns recorded a high death rate of 50 or over per thousand of population.

(B) States (Part B):—The data here relate to 20 towns with an estimated population of 2,774 thousands. The total number of towns is 32 and their population is 3,830 thousands. Thus 63% of the total number of towns representing 72% of the total population is covered. The numbers of births and deaths recorded in these towns were 1,466 and 591 representing birth and death rates of 27.5 and 11.1 per thousand of population respectively.

No town recorded a high death rate of 50 or over per thousand of population.
